

China Shineway received another invention patent

The research by China Shineway on the “Application of Centella Selected Triterpenes in Preventing Membranous Nephropathy” was recently awarded with a certificate of invention patent by the State Intellectual Property Office, under the patent code ZL 2006 1 0149632.X. Since the implementation of intellectual property oriented research directive, China Shineway’s research and development team has achieved continuous milestones in developing innovative new medicines.

Shenmai Injection of China Shineway enters into the National Torch Program

The Ministry of Science and Technology of China announced the 2008-2009 project list of its National Torch Program which includes the Shenmai Injection of China Shineway. Shenmai Injection is the only medicine commercialization project recommended by the Department of Science and Technology of the Hebei Province this year.

The National Torch Program is geared for promoting technological innovation as key driver for the commercialization, industrialization & internationalization of advanced new technologies. The Program identifies and provides support for outstanding and innovative high-tech products with proprietary knowhow and competitive advantage in the international arena.
