

New Injection workshop adds capacity for Shineway's business growth

The new injection workshop of Shineway is now GMP certified and production of injections has commenced.

The new workshop is located at the factory premises in Shijiazhuang. It has a floor area of 14,200 square meters and is capable of producing 720 million vials of Chinese medicine injections annually. The new injection workshop will further support our sales momentum and form a solid foundation for our business growth.

Forbes named China Shineway as one of the Emerging Chinese Enterprises of 2008

Forbes Magazine (Chinese version) recently published the newest list of "The Emerging Chinese Enterprises of 2008". Based on superb financial performance and strong growth potential, China Shineway is the only pharmaceutical manufacturer in Hebei Province to be selected on the list.

Candidates for the list included enterprises with 2006 sales revenue between Rmb \$5 million to Rmb \$1 billion and their operations are mainly located in mainland China. To be included in the list, candidates were evaluated based on pre-set benchmarks on sales growth, profitability and return in addition to the sales momentum over the past three years adjusted by the business condition in 2007.
