

China Shineway Received Another Health Food Certificate

China Shineway recently obtained a health food certificate from the State Food and Drug Administration of PRC, for our Dan Ge Shu Xin Soft Capsule. The product is made with Hovenia Dulcis Thunb, Puerariae Radix, Fructus Schisandrae Chinensis, Radix Salviae and other natural ingredients. It is used for reducing Hepatic Steatosis and prevention of fatty liver. At present, China Shineway has a total of 16 health food certificates including this one.

China Shineway Continues to Invest in Environmental Protection

Recently, China Shineway has completed a number of projects which further strengthen our mission in environment protection. These projects include upgrade of condensation water recycle system in the boiler facility to reduce use of vapor and coal, upgrade of pneumatic systems in various production workshops and air conditioning electrical frequency conversion which could effectively conserve energy consumption.

Though our "Ethanol Synthesis Recycling Project", China Shineway can now recycle 2,000 tones of ethanol and thereby reducing usage of 3,000 tones of new ethanol every year. With our "Recycling Water Utilization Project", China Shineway now collects and recycles condensation water for reuse and could reduce approximately 600,000 tones of fresh water purchase. While over 50% of China Shineway's premises are covered by greenery such as trees and flowers now, recycled water is being used in the cultivation of these greenery.

In addition, since 2002, China Shineway has invested in a sewage handling project which can now handle 1,500 tones of sewage everyday and expansion in sewage handling capacity will continue. In protection of air, China Shineway has also built 3 sets of water film to remove dust and 3 set of desulphurization facility to minimize any possibility in air pollution.

China Shineway will continue to invest in advanced technologies for conservation of energy consumption, effective sewage handling and recycling of water and ethanol etc to further protect our environment.
