

Shu Xie Ning Injection Approved as a State Protected Chinese Medicine

China Shineway's **Shu Xie Ning Injection (舒血宁注射液)** was recently approved as a State Protected Chinese Medicine by the China State Food and Drug Administration ("SFDA") with a protection period of seven years.

Shu Xie Ning Injection is manufactured by extracting the essence from ginkgo leaves. It is used for blood vessel dilation and microcirculation improvement, and is applicable for curing thrombotic cardiovascular diseases, coronary heart disease, angina pectoris, cerebral embolism and cerebral vascular convulsions.

According to a survey by a research institute of SFDA, Shu Xie Ning Injection is the third mostly used Chinese medicines by hospitals in China in 2004.

New Injection Workshop Commenced Construction

China Shineway has commenced construction of a new injection workshop on 11 December 2005. The new workshop will have 10 production lines, and the construction will be completed by the end of 2006. The workshop will enable China Shineway to meet the strong market demand for China Shineway's injection products and further establish a solid foundation for its future development.

Shu Jin Tong Luo granule – A New Medicine for Treatment of Cervical Vertebra Diseases

China Shineway has recently completed its development of a new medicine **Shu Jin Tong Luo granule (舒筋通? ? 粒)** which is primarily used in the treatment of cervical spondylotic radiculopathy and cervical spondylosis of vertebral artery type. A production permit and a Certificate of New Medicine were issued by the SFDA, granting an exclusive production right of this new medicine to China Shineway for five years.
