

SFDA issued new medicine certificates for two new products of China Shineway

The State Food and Drug Administration of China has recently issued new medicine certificates and production permits to China Shineway's two new products - Lian Shen Tong Lin granule and Qi Huang Tong Mi soft capsule.

Lian Shen Tong Lin granule is made of a total of thirteen herbs including rhizoma coptidis, radix sophorae flavescentis, dianthus superbus, caulis clematidis armandii, gardenia jasminoides ellis and rheum officinale baill using advanced production knowhow. It is the first Chinese medicine specifically developed for treatment of non-gonococcal urethritis.

Qi Huang Tong Mi Soft Capsule is primarily made of radix astragali, polygonum multiflorum, radix angelicae sinensis, herba cistanches, and black sesame for the treatment of constipation. While other drugs in the market mostly focus on laxative function, this new product also cleans and nourishes intestines, leading to better efficacy and longer laxative effect.

China Shineway received honorable recognition for its fulfillment of upmost corporate social responsibilities from the Hebei Province

At the 2nd Annual Nomination of "Enterprises with Upmost Corporate Social Responsibilities" and "Top 10 Outstanding Individuals of Upmost Corporate Social Responsibilities" of Hebei Province, China Shineway was named as one of the "Enterprises with Upmost Corporate Social Responsibilities" and Mr. Li Zhenjiang, the Chairman and President of China Shineway, was named as a "Top 10 Outstanding Individuals of Corporate Social Responsibilities".

There were a total of 168 companies participated in this nomination. The nomination standards are based on production safety, employee health and legal right protection, provision of safe products and services, compliance of ethical business practice, preservation of environment, saving energy and reducing pollution, charitable support, etc. Among the participants, 12 enterprises were selected and honored.
